

Dear Client:

We are pleased to announce that Hudson Marine Management Services and HudsonTrident will be conducting an annual OPA 90 and ISPS Code Training Seminar and Table Top Exercise in Philadelphia during May 4-5, 2009.

The seminar will be held in The Union League of Philadelphia, a beautiful private club of great cultural and historic value, at 140 S. Broad Street, Philadelphia, PA. <http://www.unionleague.org>

Hudson Marine will host a client dinner on Tuesday evening, May 5th, on board the tall ship Moshulu which, after many journeys, has come to rest on the Philadelphia waterfront. www.moshulu.com

In order to reserve a space at the Seminar for you and your colleagues, please visit our website http://www.hudsonmarine.com/seminar_schedule.htm and fill out the Online Seminar Reservation Form or return the attached Reservation Form* to Marikay.McKeon-Murphy@hudsonmarine.com by Friday, April 17, 2009.

Annual Qualifying OPA 90 Exercise – May 4, 2009

We have continued to develop more challenging and interesting exercise scenarios by including on-line response tools, greater participation by clients, insurance, and salvage/vessel response activities. A section of the day's Program will be dedicated to Crisis Media Management Training. Attendance to one of Hudson Marine's Annual OPA '90 Seminars satisfies your company's OPA'90 requirement (included in United States 33 CFR 155.1060) concerning annual exercises which are to be conducted with your Spill Management Team.

The United States Coast Guard will be participating in the exercise.

Each attendee will be issued a certificate that fulfills all of the OPA 90 legislation requirements as well as for California for those Owners/Managers whose fleets are trading to the State of California.

ISPS Seminar, Training and Exercise – May 5, 2009

The ISPS Seminar, Training and Exercise have been designed to meet the highest current (2009) worldwide standards for Ship Security Exercises. The basic objective of this exercise is to provide the mechanisms that will both "test" and "validate" the Ship Security Plan (SSP) for the Company Security Officer (CSO). The exercise is intended to test the entire security program of the ship and the Company.

Each attendee will be issued a certificate that fulfills all of the ISPS Code requirements.

If you have any questions or comments, please contact me at your earliest convenience.

Best Regards,

Marikay McKeon-Murphy
